WORK EXPERIENCE

Frontend Developer | Banao Technologies, Across the globe   *Aug 2022 - Present*

- Worked on projects assigned by Banao Technologies, projects included Ecommerce websites, College helper websites, Assessment platform and others mostly in React also on Angular, understood client requirements and feedbacks and provided accordingly.
- Projects required tasks like **Responsive web designs** from scratch and also with frameworks like bootstrap and tailwind css, did **Api integrations** for api such as login,signup, CRUD apis, cart flow, blogs, and others, used Redux and context Api for state management and improving performance.
- Implemented features such as **Payment Gateway integration**, **Google Maps api integratio**n for location which further filtered a list of salons in an area for a project, **Google analytics** for a project having metrics like bounce rate, page views, active users etc.
- **Drived the Design and Development** of company's product website(Across the Globe) add on - Assessment Platform, **mentored and worked with interns** on this.It was made in **React**, **Redux Toolkit**, **Bootstrap 5**, Which also acted as a standalone platform for assessing the interns in the Internal Team.
- Provided **Code reviews**, mentored interns and collaborated with colleagues, have **taken interviews** for React and MERN internships.
- **Backend** : Worked on **backend** of Assessment platform made in **Nodejs, Express, MongoDB**.
  - Made CRUD APIs questionbanks, questions, collections, attempts, evaluate.
  - **Used AWS S3 bucket** for uploading files and images, also created internal service for handling this functionality.
  - Made **Api for Auto generation of emails** for notification or information regarding assessment and its link.

Frontend Developer Intern | ForeignAdmits   *Jan 2022 - Mar 2022*

- Worked on the **company's own consultancy and services product** developed in **Angular, Typescript, BootStrap**. Collaborated with the team in the Agile methodology environment.
- Built landing page, profile page for Mentor User, dynamic dashboard for all different types of users from figma designs.
- **Developed new features** like calendar from angular calendar library and video meetings from Jitsi meet, also implemented forms with Formly library and data tables.
- Daily Tasks included **fixing bugs, refactoring existing components and adding new components.**
